We had seen at the time of the Pandemic when there were no doctors in the hospital nor any health workers when the corona had increased a lot, the doctors and health workers who were there were working for 18 hours and when the patients had increased a lot, then at that time who can forget the condition lots of lives gone because they could not get treatment at the right time, the reason for this being the lack of doctors and the lack of health workers which is the most important reason being the health workers gives first aid treatment even before the doctor comes, due to all these shortcomings, many people lost their lives in Pandemic. That's why the healthcare industry needs more trained and qualified Doctors and healthcare staff to fulfil the gap ratio between patients and the Health care sector and its facilities. That's why the increase in demand for experienced and skillfully trained professionals in the healthcare industry to support and care for patients in their time of need so that there will be no death due to lack of proper treatment.
